

MICRO MOTORS **INTRAFLOW ANESTHESIA DELIVERY SYSTEM**

Introducing a new era in patient comfort and dentist productivity

The IntraFlow™ Anesthesia Delivery System is the latest technology in pain management for the dental professional, and a major breakthrough in fear management for the anxious dental patient. The IntraFlow System uses patented intraosseous injection technology in a simple, one-step technique that provides immediate pain relief and profound pulpal anesthesia in about one minute.

PATIENT COMFORT

- No lingering numbness to the cheek, lips or tongue
- Patient can immediately resume normal activities, talking, eating, drinking
- Facilitates more flexible scheduling
- Relieves patient anxiety regarding "The Shot"

DENTIST PRODUCTIVITY

- One step, easy to use
- Saves time, no waiting for patient to get numb
- Profound and reliable anesthesia
- Work in multiple quadrants during a single visit
- Reduces the need for multiple follow-up visits
